

Module Board

A guide to planning your NUS degree

Add a course by its code and the board pulls its name, units, workload and prerequisites from NUSMods. Lay those courses across your semesters, tell each one what it counts toward, and the board keeps score: units per bucket, hours per week, prerequisites in the wrong order, and a worklist of everything still outstanding. Works on a phone, shares by link, and prints to one page for an advisor.

An initiative of medhanshkhemka — a side project made to help fellow students. Not an official NUS or NUSMods product. Always verify against NUSMods and EduRec.

The board at a glance

Everything on one screen: what you have to take on the left, when you'll take it in the middle, and whether it all adds up at the bottom.

The Module Board interface is divided into several sections:

- Top Bar:** Includes a search bar for course codes (1), a dropdown for the academic year (2), a toggle for light/dark theme (3), and a unit counter (4).
- Left Sidebar:** Contains requirement categories (6), composition rules (7), and a graduation checklist (9).
- Main Area:** Displays a grid of course cards organized by semester (8). Each card shows the course name, units, and a progress bar.

Numbered callouts highlight specific features:

1. Search bar for course codes.
2. Academic year dropdown.
3. Theme toggle (light/dark).
4. Unit counter showing 16 of 160 units placed.
5. Requirements section on the left sidebar.
6. Requirement categories on the left sidebar.
7. Composition rules on the left sidebar.
8. Course cards organized by semester.
9. Graduation checklist at the bottom.

- 1 Type any course code here. Almost everything starts in this box.
- 2 The academic year the course data is pulled from.
- 3 Light or dark.
- 4 Units on the board against your degree total.
- 5 Requirements — every bucket, its target, and how far along you are.
- 6 Second majors, minors and any standalone requirement your faculty adds on its own.
- 7 Courses you've added but haven't placed in a semester yet.
- 8 One card per semester: eight of them in a four-year degree.
- 9 The graduation checklist — what needs attention, then the full record.

The top bar

Adding courses, choosing the data year, and undoing mistakes.

The screenshot shows the top bar of the Module Board interface. It includes a search bar at the top right, a course code input field on the left, a year dropdown, a course list, and a summary box on the right. Numbered callouts (1-6) highlight specific features: 1 points to the search bar, 2 to the year dropdown, 3 to the course list, 4 to the theme toggle, 5 to the undo button, and 6 to the units placed summary.

Module Board NUS · units, workload, requirements

+ Type a course code – CS2040S, BT1101

GESS1025 Year AY2025-2026

NUSMODS 2025-2026

Undo

116 of 160 units placed

- 1 Type a code — CS2040S, GESS1025 — then pick from the list or press Enter. Codes that aren't in the list can still be added by hand.
- 2 The academic year course data is fetched for.
- 3 Green means NUSMods data loaded. Orange means the board couldn't reach it and is running on a small built-in list — you can still add courses and fill in the details yourself.

- 4 Light or dark. Your choice is remembered on this browser.
- 5 Undoes the last change. Ctrl / Cmd + Z does the same.
- 6 Total units placed against your degree total.

Adding a course

Type two or more characters and the matching courses appear. Pick one and the board fetches the rest.

The screenshot shows the NUS Module Board interface. At the top, there is a search bar with the text "NUS · units, workload, requirements" and a dropdown menu. The dropdown menu is open, showing two suggestions: "CS2030S Programming Methodology II" and "CS2040S Data Structures and Algorithms". The first suggestion is highlighted. To the right of the search bar, there is a "Year" dropdown menu set to "AY2025-2026". Below the search bar, there are several sections: "UE · · · · · Unrestricted elective (undecided)" with a "40 / 60" progress bar, "Digital Literacy" with a "GEX" and "SLOT" button, and "Year 1 · Sem 1" with a "16u" workload. The "Year 1 · Sem 1" section is highlighted with a red box and a red circle with the number 1. The "Year 1 · Sem 2" section is also highlighted with a red box and a red circle with the number 2. The "Year 2 · Sem 1" section is highlighted with a red box and a red circle with the number 3.

The screenshot shows the "NOT PLACED YET · 2" section of the NUS Module Board. It contains two course suggestions: "UE · · · · · Unrestricted elective (undecided)" with a "4u" workload and "GEX · · · · · Digital Literacy" with a "4u" workload. Both suggestions have a "GEX" and "SLOT" button. The "UE · · · · · Unrestricted elective (undecided)" suggestion is highlighted with a red box and a red circle with the number 3.

1 Start typing a code. Arrow keys move through the suggestions, Enter picks one.

2 Each suggestion shows the code and the official course name.

3 A new course lands in 'Not placed yet' with its name, units, workload and prerequisites already filled in from NUSMods. Move it into a semester when you're ready.

Reading a course card

Each card carries the four things you need while planning, and flags anything unusual.

Year 2 · Sem 1 **16u**

+ tag this term (SEP, NOC, LOA...)

Design Thinking for Impact

5

CD

- 1 The course code.
- 2 Units. Editable, in case your case differs from the published figure.
- 3 The official course name.
- 4 Weekly workload, split the way NUSMods splits it: lecture, tutorial, lab, project, preparation.
- 5 Flags sit along the bottom. Grey SLOT means a placeholder, blue is a GE pillar, gold is a category tag like CD or ID, orange is a specialisation, and DOUBLE marks a double-counted course.

The semester and its workload ruler

Unit counts tell you what you're allowed to take. The ruler tells you what it will feel like.

- 1** The semester this card represents.
- 2** Units in this semester. Turns orange past 23 units or 45 hours.
- 3** Every course's workload stacked into one bar, coloured by type.
- 4** The line marks 45 hours a week. Past it, you are planning a hard semester.
- 5** Total contact and preparation hours for the semester.
- 6** Tags this term as an exchange, NOC, leave or anything else — see later in this guide.

Moving courses around

Drag with a mouse, or press and hold on a phone or tablet. Either way the card lifts and the target semester lights up.

- 1 The card you're holding follows the pointer.
- 2 The semester under it lights up — that's where it will land.
- 3 Its old position stays dimmed until you let go.

- 4 On touch, press and hold for about a third of a second first. A short swipe scrolls the page as usual, so the board never fights your finger.
- 5 Then drag as normal — and if you hold near the top or bottom edge, the page auto-scrolls so you can reach a distant semester.

The course drawer

Tap any card to open it. This is where a course is told what it counts toward.

▼

Targets sum to 176 units; 4 are double-counted so far. Double-counted units credit two buckets but count once toward the 160.

- 1 The bucket name.
- 2 Its unit target. Click the number and change it to whatever your programme actually requires.
- 3 How much of that target is already on the board.
- 4 Composition rules for this bucket, showing where you stand against each one.
- 5 Your degree total. 160 units for most four-year honours degrees.
- 6 Programme length. Changing it rebuilds the grid and returns any orphaned courses to the tray.

Categories and composition rules

Two different jobs. Requirement categories add a bucket of their own; composition rules describe the mix inside a bucket you already have.

2 now

For a bucket whose requirement is written as a mix — "12 units of CD/ID, at least 2 ID, at most 1 CD". Courses whose code starts with the tag are matched automatically.

- 1 Second major, minor, or 'other' for a compulsory block that isn't a programme at all.
- 2 Its name — Statistics, Entrepreneurship, Computing Ethics.
- 3 Units required. Second majors usually ask for around 40, minors around 20.
- 4 The double-count cap. The board warns you when you exceed it but won't stop you — the real limit depends on your pairing, so check it with your faculty. Leave it at 0 for no cap.
- 5 'Other' covers cases like SoC's Computing Ethics: compulsory units belonging to neither the common curriculum nor the major core. It gets its own bucket, bar and checklist row.
- 6 Add as many as you're attempting.
- 7 The tag. Courses whose code starts with it are matched automatically, so CD2101 picks up CD on its own — or tick it by hand in the course drawer.
- 8 What you call it.
- 9 Which bucket the rule applies to.
- 10 The minimum number of courses. Set ID to 2 and the checklist won't clear until you have two.
- 11 The maximum, if there is one. Blank means no limit. Setting CD to a maximum of 1 makes '1 CD + 2 ID' and '3 ID' both valid, and '2 CD + 1 ID' fail.

Specialisations and placeholders

A specialisation observes courses rather than consuming them, and placeholders hold a slot before you've chosen what fills it.

SPECIALISATIONS

+ Add

1

Artificial Intelligence

×

2

needs

STATISTICS

6

COMPUTING E

ARTIFICIAL

Park a slot now, swap in the real code when you pick it.

- 1 The specialisation name.
- 2 How many courses it needs.
- 3 How many you've tagged so far. Tag them in the course drawer — a tagged programme elective still counts toward its 20 units, so nothing is spent twice.
- 4 One chip per GE pillar — GEA, GEC, GESS, GEN, GEX and Communication — dropping an empty slot into the tray, already assigned to that pillar.
- 5 Chips also appear for every composition rule, so CD and ID slots are one tap away.
- 6 And one for each category and specialisation you've added.

Exchange, NOC and other terms

These happen inside a semester rather than adding one, so they're a tag on the term, not an extra block.

Year 3 · Sem 2 16u

The graduation checklist

What needs attention comes first; the full record sits underneath, folded away. Below the semester grid.

The screenshot shows the 'GRADUATION CHECKLIST' interface. At the top right, a progress indicator shows '1 / 20'. Below this, a red-bordered box labeled '2' contains the heading 'Things need attention' and a sub-header 'Problem first, then what is simply unfinished.' Inside this box, a red-bordered box labeled '3' highlights the 'Prerequisite order' item, which states 'CS4248 placed before their prerequisites'. Other items in the grid include 'Major core' (40 of 60 units · 20 to go), 'Programme electives' (16 of 20 units · 4 to go), 'Statistics' (12 of 40 units · 28 to go), 'Unrestricted electives' (12 of 16 units · 4 to go), 'Artificial Intelligence' (3 of 4 courses tagged), 'Total units' (116 of 160 units on the board), 'Every course in a semester' (2 still in the tray), and 'Internship (12 weeks)' (tick it yourself when it is done). Below the grid, a section labeled '5' for 'GE pillars' shows several completed items: 'Data Literacy GEA1000', 'Cultures and Connections GEC...', 'Singapore Studies GESS...', 'Communities and Engagement GEN...', 'Digital Literacy GEX...', and 'Communication ES2660'. Below this are expandable sections for 'Unit requirements' (3 / 7), 'Rules & constraints' (2 / 6), and 'Your own' (0 / 1). A red-bordered box labeled '6' highlights the 'Your own' section, which contains a text input field 'Add your own requirement — internship, capstone, language exemption...' and an 'Add' button. A footer note states: 'Pillars tick themselves when a matching course is on the board; tick any row by hand if your faculty maps it differently.'

- 1 How many requirements are satisfied.
- 2 Everything outstanding, gathered into one worklist with real problems at the top.
- 3 Red means something is wrong rather than merely unfinished: a prerequisite out of order, a limit breached, a cap exceeded.
- 4 Underneath, four sections hold the complete record — GE pillars, unit requirements, rules and constraints, and your own.
- 5 Open one and everything satisfied becomes a compact green chip. Chips you ticked by hand can be clicked to undo.
- 6 Add requirements the board can't know about — an internship, a capstone, a language exemption — and tick them yourself.
